ADITYA MORE

QA AUTOMATION ENGINEER | PLAYWRIGHT • TYPESCRIPT • APPIUM • JAVA • JMETER

Mumbai, India | +91 8888052888 | adityamore.se@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

QA Automation Engineer with 10 months of industry experience in software quality assurance, with a focus on web automation using Playwright and TypeScript. Familiar with Java-based automation, mobile testing concepts using Appium, API testing, SQL data validation, and performance testing fundamentals with Apache JMeter. Comfortable with test design, defect reporting, regression testing, and Agile team workflows. Focused on building maintainable, reusable automation and validating end-to-end business flows.

TECHNICAL SKILLS

Web Automation	Playwright, TypeScript, locators, assertions, waits, Page Object Model (POM), data-driven testing
Mobile Automation	Appium, Android application testing, emulator/device testing [keep only skills you can demonstrate]
Java Automation	Core Java, Selenium WebDriver, TestNG, Maven
Performance Testing	Apache JMeter, Thread Groups, HTTP Samplers, Assertions, response-time and error-rate analysis
API & Database	Postman, REST API validation, HTTP methods/status codes, JSON, SQL, PostgreSQL/MySQL
QA & Delivery	Functional, smoke, sanity, regression, integration and end-to-end testing; test cases; defect lifecycle; Jira; Git/GitHub; Agile/Scrum
CI/CD & Reporting	Jenkins or GitHub Actions [include only if used], HTML test reports / trace-based debugging

PROFESSIONAL EXPERIENCE

QA Engineer / QA Automation Engineer | *Nimap Infotech* | *[Dec 2025 – Oct 2026]*

- Contributed to functional and regression testing of web application workflows, translating requirements into test scenarios and test cases.
- Developed and maintained Playwright tests in TypeScript using reusable page objects, reliable locators, assertions, and test data.
- Investigated failed test runs, documented defects with reproducible steps and evidence, and collaborated with developers on retesting.
- Validated application data and workflow outcomes using SQL queries and API checks where applicable.

SELECTED PROJECTS

Shipment Management Web Application | Playwright + TypeScript

- Created a POM-oriented automation structure for shipment creation, tracking, and status-update workflows.
- Used data-driven scenarios to validate multi-field forms, including positive, negative, and boundary inputs.
- Performed SQL-based checks of saved shipment records and logged defects for validation issues.

Distributor & Retailer CRM Portal | Java Automation

- Worked on modular UI automation concepts using Java and Selenium WebDriver with reusable page/action methods.
- Covered smoke and regression scenarios and documented defects across key CRM workflows.
- Explored REST API validation and structured test reporting as part of the QA workflow.

POS System API Performance & Mobile App | Appium + JMeter

- Automate login/navigation flows on an Android emulator with Appium and validate key UI states.
- Built a JMeter test plan with Thread Groups, HTTP Samplers, assertions, and summarize response-time/error-rate results.

EDUCATION

B.Tech, Computer Science & Engineering | Dr. D. Y. Patil Pratishthan's College of Engineering, Kolhapur | 2024

CERTIFICATIONS

- Test Automation with Selenium WebDriver for Java — LinkedIn Learning
- Build your first end-to-end test with Playwright — Microsoft
- Postman API Testing Path — Postman
- Learning TestNG — LinkedIn Learning
